

Navigating the Map

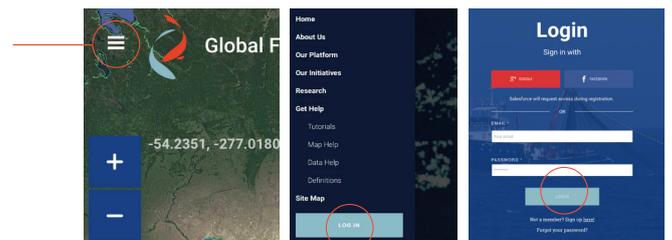

OVERVIEW

How do I make sure I'm logged in?

Check if you are logged into your account by clicking here.

A menu will appear at the bottom with the option to 'log in' if you have not done so.

How do I view different parts of the world?

Use your mouse to click and drag to scroll around the map.

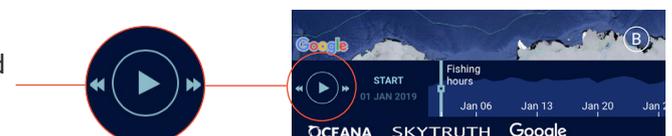

You can zoom in or out using your mouse pad or the +/- icons on the left side of the map.

Share your workspace - click here to create a shared workspace and copy a link to that space.

Latitude and longitude are displayed here.

Play fishing activity for your selected time period, with the option to slow down or speed up the rate at which activity plays by clicking on fast forward or rewind during playback.

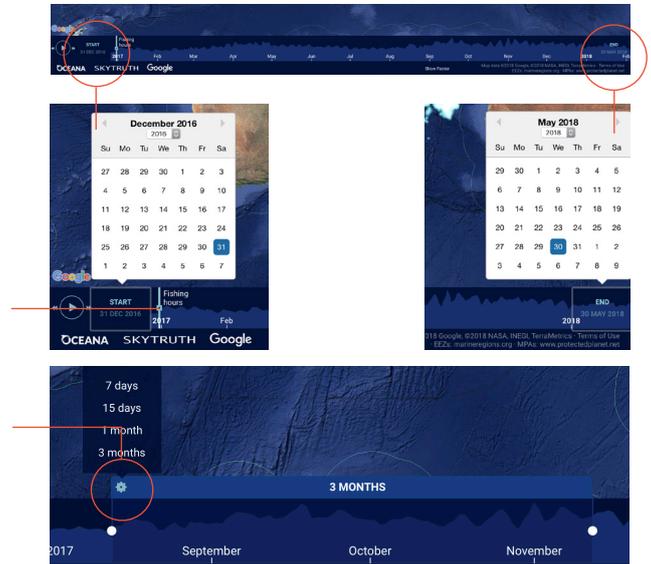

How do I search for fishing activity within a certain time range?

The time slider at the bottom of the map determines the time period you are viewing.

There are several ways to manipulate the time slider:

- Select start and end dates from the calendar, dating back to January 1, 2012, and up to near real-time.
- Click on the bars on the left or right edge of the time slider, hold and drag to change the start or end time.
- Click on the gear icon in the upper left corner of the highlighted time frame within the time slider to adjust the time frame you are interested in.

What's in the toolbox?

Expand or collapse the toolbox.

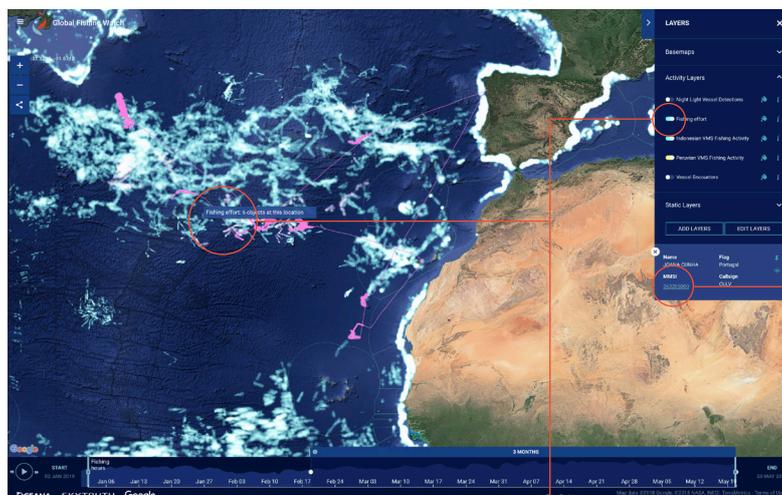

The toolbox is your control center for the data displayed on the map.

Expand the tabs to:

1. Search for vessels or create a custom fleet;
2. Change the source of fishing effort displayed (AIS, VMS, VIIRS, etc.), edit static layers, like EEZ or MPAs, overlaid, or edit the basemap display;
3. Filter fishing activity by country or gear type.

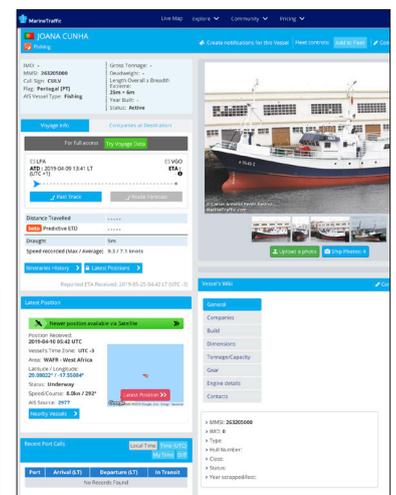

How do I select a specific vessel I see in the map?

Click on fishing effort to open vessel identity in the toolbox and track the vessel.

This may require zooming in where there are multiple vessels in close proximity.

Click on the vessel's MMSI number in the toolbox to open the vessel's page in [marinetraffic.com](https://www.marinetraffic.com).
